

## Project Development Phase

### Delivery of Sprint-4

<b>Team ID</b>	PNT2022TMID08457
<b>Project Name</b>	Smart Farmer-IOT Enabled Smart Farming Application

In Sprint-4 we are going to make the user interact with Software.

**Step-1:** First user need to download the android APK file from MIT app inventor where we developed our mobile application and install in their mobiles.

**Step-2:** After successful installation we can find app icon in our mobile as shown below.

**Step-3:** After clicking the app icon it ask the user need to create username and password.so give username and password and click the signup button. The user can see interface like these as shown below.

**Step:4** After successful login.The next page will be open. In that page we can see the real time temperature , humidity and soil moisture reading and motor ON and motor OFF control button also as shown below.

**Conclusion:** we are successfully created the IOT enabled smart farming application.
